### History:

The story of the company begins in 1962, when one of the most powerful wine factories in the Soviet Union was launched – Tbilvino. For years the factory remained an essential part of the Soviet winemaking industry (90% of Georgian wines were made in this factory).

In the late 1990s it emerged as an independent wine company with new dynamic management, philosophy and approaches. Currently Tbilvino is again one of the largest, most awarded producers and exporters of high quality wines from Georgia.

### Vinification:

After 4 days on the skins, the wine is then pressed off and finishes its primary fermentation in temperature-controlled tanks at 26°C. Once desired residual sweetness is reached, the fermentation is stopped by chilling. Wine is stored in chilled tanks until final bottling. This results in fruity and lively character in the final wines. The vineyards are located in the Kakheti region of the eastern Georgia.
